$$\hat{f}(x) = \theta_1 f_1(x) + \theta_2 f(x_2) + \dots + \theta_p f_p(x)$$

where θ_i are params and $f_i(x)$ - basis function.

In this case we have 10 params.

a - 1 const

b_1, b_2, b_3 - 3 linear

$c_1, c_2, c_3, c_4, c_5, c_6$ - 6 quadratic.

Therefore

$f_1(x) = 1$ $\quad f_2(x) = x_1$ $\quad f_3(x) = x_2$ $\quad f_4(x) = x_3$

$f_5(x) = x_1^2$ $\quad f_6(x) = x_2^2$ $\quad f_7(x) = x_3^2$ $\quad f_8(x) = x_1 x_2$

$f_9(x) = x_1 x_3$ $\quad f_{10}(x) = x_2 x_3$

So $p = 10$ and here are the basis func
